World Climate Game

**Strengthen your company and
your team for a sustainable future!**

World Climate Game

Together for a Sustainable Future

The World Climate Game is an interactive app-supported board game designed to raise awareness of climate change and sustainable business practices. This innovative workshop-format game provides an opportunity to convey insights from climate science in an engaging and educational manner.

As a tool for environmental and climate education, it provides an interactive platform that highlights our relationships with the environment and the impact of our behaviors on the climate. In addition to educating participants about the causes and effects of climate change, the game primarily aims to raise awareness of economic and ecological interconnections and to strengthen social competencies.

Experience sustainability in a playful way!

Motivating
Forward-thinking
Practical

World Climate Game
Together for a Sustainable Future

Your Benefits as a Company

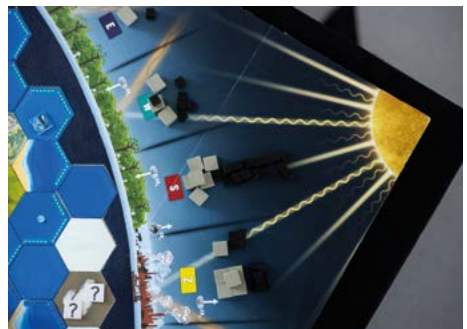

The World Climate Game is particularly suitable for companies that prioritize sustainability and climate protection in their corporate strategy and are eager to expand their educational offerings in these areas.

The World Climate Game provides you with innovative opportunities to:

- Strengthen life skills such as teamwork, critical thinking, and problem-solving to tackle future business challenges.
- Demonstrate your commitment to environmental protection and sustainability, enhancing your Corporate Social Responsibility (CSR).
- Foster relevant sustainability competencies within your workforce and raise awareness for sustainable resource management in your company.
- Understand the impact of global developments and interdependencies on your business reality and strategy.

The World Climate Game is designed for:

- Apprentices and trainees
- Training and team-building activities for your employees

Learning Objectives

In addition to the practical and playful delivery of climate and environmental knowledge, the game fosters awareness of global interconnections and individual actions, strengthening the following competencies:

© Daniela Rusch, Energiemuseum/Vorarlberg

Problem-Solving Skills and Conflict Resolution:

The World Climate Game encourages the development of solutions and creative ideas to reduce CO² emissions. Your team analyzes complex problems and works on sustainable solutions.

Connected, Critical, and Independent Thinking:

The interactions between the environment and the economy, along with the associated business challenges, are made visible by integrating global thinking with economic practices.

Teamwork, Cooperation, and Empathy:

The game is played in groups, promoting teamwork and communication among participants. Solutions must be developed and discussed collaboratively, enhancing social competencies.

Self-Efficacy and Communication Skills:

The game allows participants to experience how individual decisions and actions impact the climate in a playful manner. Your team can explore various scenarios to understand the effects of their behavior on the environment and society.

Awareness and Motivation for Climate Protection and Sustainability:

The game raises awareness of climate protection and sustainability, demonstrating how your employees can actively contribute to environmental conservation. Participants learn how to reduce their ecological footprint, motivating them to make more environmentally friendly choices in their daily lives.

Methodology and Objectives

The playful approach and structure (simulation game and board game), combined with technological elements (app/database), contribute to a comprehensive understanding of the ecological, economic, and social challenges of our time.

Climate Knowledge and Environmental Awareness

The game begins in the year 2000 and concludes after ten rounds in 2100. In each round, various tipping points, extreme weather events, environmental disasters, and social crises are triggered, depending on the players actions. Participants take on the roles of global decision-makers from politics, business, and civil society. They navigate realistic global economic scenarios and manage them through a web app. This engaging format encourages players to confront the global challenges of our time while simultaneously transitioning to a sustainable lifestyle and economic model.
